

PUTRONS N[®] ND – Large Flow Double Suction Pump 浦川 N[®] ND 大流量双吸泵

ND double suction internal gear pump is a new and unique patented product developed for large flow, high pressure and low weight requirements of petrochemical industry.

ND双吸内齿轮泵是为石油化工行业大流量高压低重量要求而开发的全新的专利产品。

The features are:

- Axial force balance
- Maximum flow is 350 m³/h, with built-in speed reducer
- Maximum pressure is 80 bar with balanced radial force design
- Light weight and small floor space

其特点是：

- 轴向力平衡
- 最大流量可达350 m³/h，内置减速机
- 压力最大可达80 bar，径向力平衡
- 重量轻，占地面积小
